Form and Function of Disorder

Dear Authors,

The journal 'physica status solidi (b) - basic solid state physics' will be honored to celebrate the sixtieth birthday of Professor Dr. **David A. Drabold** and his contributions in the field of Disordered Materials with a Special Issue titled **Form and Function of Disorder** (in conjunction with the conference May 30–31, 2020 in Athens, Ohio, USA). In collaboration between the Guest Editors and the pss Editorial Office we cordially invite you to contribute a manuscript. This will take the form of an **Original Paper** or a **Feature Article** (see below). Please contact the Guest Editors if you are interested in the Feature Article option.

The physica status solidi journals are designed to reach a broad audience in the field of condensed matter and materials physics. pss is one of the largest and well-established publication platforms in solid state physics – now nearly 60 years in business – and is widely accessible as part of many institutional site licenses, evidenced by close to one million article downloads annually.

All submitted manuscripts will undergo **peer review**. According to the editorial policy of pss, two positive recommendations by independent referees are a prerequisite of acceptance. Peer review and publication occur rapidly on individual manuscript basis. Published in Wiley Online Library **Early View** few weeks after acceptance, your article is citable immediately; hence there is **no waiting for the remainder of the contributions**. When all articles are complete, the topical section will be assembled in a regular monthly issue of pss (b). Such a clustering of related articles will raise the visibility of these articles significantly.

Please refer to the author instructions available on our homepage www.pss-b.com → **Author Guidelines** (including optional Word template and LaTeX style files and the link to [online submission](#) through Editorial Manager – please **mention the special issue** in your cover letter and select the appropriate topical section/category **Form and Function of Disorder** during online submission to expedite handling).

We look forward to receiving your contribution!

Parthapratim Biswas, Gang Chen, Serge Nakhmanson, Jianjun Dong, and Sabine Bahrs

Information on submissions:

Feature Articles should provide an overview of a current topic in the format of a topical review of about 10-12 (max. 15) journal pages or 10 000 words. Due to this length restriction, a complete bibliographic overview on the existing literature cannot be expected but referencing should be well-balanced. The manuscript should represent a snapshot of most recent progress, the state of research and particularly relevant aspects, with focus on the highlights and possibly open or controversially discussed questions. They are intended to inform an audience not immediately familiar with the specific topic. Original, previously unpublished results may also be included to a certain extent.

Original Papers expose original and previously unpublished work of general interest to the community. Manuscripts do not have a strict length limit (typical lengths vary from 6 to 10 journal pages or 5 000 to 8 000 words). Articles must fulfil the standards and requirements of the journal. Acceptance of a contribution for presentation at the workshop does not automatically include publication in the special issue. The main criteria for consideration by pss (b) are:

- The importance, relevance, and novelty of the results match those expected for a regular journal paper.
- The general quality of the manuscript and the amount of information provided is appropriate for an international journal. Serial or incremental, pure self-referential and lab-report-style work is discouraged.
- Main results have not yet been published (also not in conference proceedings) and are not under consideration for publication elsewhere.

Online submission: www.pss-b.com → Submit an Article, www.editorialmanager.com/pssb-journal

Further **benefits** for pss authors include:

- No page charges or publication costs for authors, free online color
- Modern article formats (PDF, Enhanced PDF, HTML, Enhanced Article for mobile devices)
- Supporting information, e.g. additional data, figures, videos or animations can be published online
- [Wiley OnlineOpen](http://WileyOnlineOpen) option compliant with funder mandates and supported by many institutions
- Author suggestions for journal cover figures or frontispiece pages, especially for Feature Articles
- The PDF file of the article will be provided as electronic reprint free of charge. Color print (at reduced rates for Feature Articles), journal issues, reprints with cover page, posters etc. are available for purchase
- pss is indexed in ISI Web of Science and all other major abstracting databases
- Promotion of selected content via web portals, e.g. advancedsciencenews.com, newsletters, and press releases
